

Pure service

EUROWATER offers many different services:

- Stand-by service/service agreements
- Free water analyses
- Salt for softening plants
- Renovation/replacement and optimization of existing water treatment plants

You can read more about EUROWATER and our products on eurowater.com

Company profile

EUROWATER develops, manufactures, markets, and services complete water treatment solutions. The products are used in different processes for example in industrial companies, institutions, heat and power plants, waterworks, and private water supplies.

The group has more than 240 employees of which half is based in Denmark, mainly at our head office and production facilities.

EUROWATER After sales service department

We offer an international after sales service characterized by fast problem identification and solving. Please contact your local office if you need plant service.

Order service, salt, and test kit on our homepage, eurowater.com, under After sales service.

Water analyses

We have our own laboratory in Denmark where we carry out analyses of ground water samples. The water analysis provides the background for choice and design of water treatment solutions. The analysis is free of charge and is an important tool – among other things to comply with the local legislation on water quality.

Regeneration salt, spare parts, and accessories

- Salt for softening plants (rock salt or salt tablets). Various test kits, for example for periodic hardness control of the water after treatment in a softening plant. Order salt and test kit on our homepage
- Fillings for filtration plants and selective ion exchange plants, membranes for RO plants, and filter bags
- Spare parts: The service vans are equipped with a wide range of spare parts, mainly of own production
- Accessories for water treatment plants, for example compressors for filtration plants

Stand-by service/service agreements

Our After sales service department solves both acute problems and maintenance tasks. You can order service on our homepage.

Guaranteed optimum operation of your water treatment plant through a service agreement on preventive service with your local sales and service office. Contact us for more information on the contents of a service agreement so that we can make an individual and non-committal quotation adapted to your requirements.
